

## **CLAIMS**

What I claim as my invention is that:

1. The SK PADS are easy to use.
2. The SK PADS attach to a person's work clothes regardless of that person's height weight or body structure, maximizing the utility of this invention.
3. The portion of the SK PAD system that is heat sealed (ironed on) to the workpants can be washed with the pants.
4. The SK PADS are painless to the wearer because there are no fasteners that are constrictive.
5. The SK PADS will not cut off blood circulation to the wearer's legs, which could cause discomfort.
